Review of Operations

HIGHLIGHTS

- 2,000m drill program at the Rio Verde Copper Project completed with the discovery of an exceptionally high grade copper zone confirmed and justifies further drilling.
- Agreed terms to acquire rights to earn into 75% of the Conceicao Nickel Platinum Project.
- Major 50,000m copper and nickel platinum drilling program launched.
- Drilling recommenced at the Rio Verde Copper Project targeting high grade copper. High concentrations of copper already logged in drill core. Ramp up of drilling programme started with additional people in place and additional rigs mobilising.
- Iron Ore Project drilling approvals obtained and Vale SA expected to start drilling within weeks. The Trindade North option agreement has the potential to generate payments of between \$10m to \$40m for Avanco.
- Key appointments made, including Mr Simon Mottram appointed to Avanco Board as Executive Director for Exploration and Colin Jones as a Non-Executive Director.
- Successfully raised \$20 million to fund an aggressive exploration and acquisition strategy in the Carajas.

EXPLORATION – COPPER AND NICKEL PLATINUM PROJECTS

At Rio Verde the Company completed a 2,000m drilling program with results confirming the discovery of an exceptionally high grade copper zone at the Antas South Deposit. The high grade mineralisation extends over 300m laterally and remains open along strike and at depth. Interpretation also indicates the presence of a second as yet undiscovered highly mineralised structure existing to the north of the current high grade zone.

The Company launched a major 50,000m exploration drilling programme over its Copper and Nickel Platinum Projects:

Antas South Copper Deposit (drill out and extensions):	25,000m
Rio Verde Project (new copper targets):	10,000m
Serra Verde Project (copper targets):	5,000m
Regional copper targets (new projects):	5,000m
Nickel and platinum targets:	5,000m

The comprehensive and multi target programme has been planned to realise maximum value from the Company's assets with early focus continuing to be directed at drilling out and extending the high grade copper discovery at the Antas South Deposit.

To date approximately 8 holes for 475m has been completed since recommencement of drilling in late November 2010. High concentrations of copper mineralisation have been logged in some holes. A second diamond drilling rig has now arrived at the Antas South Copper Deposit and has commenced drilling immediately.

With additional staff now in place and the arrival of additional drilling rigs in the coming months, the Company will drill test the neighbouring Serra Verde copper property. Avanco will likely increase drilling capability to include additional diamond and reverse circulation rigs as it steps out to test deeper mineralisation, new regional copper targets and the Nickel Platinum Project.

IRON ORE PROJECT

Avanco ceded the exploration of Trindade North to Vale SA (Vale) and also agreed to vendee Vale an option to acquire the property after satisfying certain conditions precedent. Having obtained all the approvals required for exploration at the Trindade North Iron Ore Project the area is now ready for Brazilian major Vale to commence drilling.

Trindade North is believed to be highly prospective for iron ore and is situated proximal to Vale's giant N4-N5 iron ore mine in the Carajas, Brazil. The option agreement has been signed and will be executed as a partnership with Vale being granted exclusive exploration rights for up to 3 years. On satisfying conditions precedent, Vale will have earned the right to exercise an option to acquire sole ownership of the property. Remaining key provisions include:

1. Vale to pay Avanco US\$350,000 on signing and obtaining drilling approvals.
2. Vale should drill at least 2,500m within the first year.
3. After one year, Vale must pay Avanco US\$600,000 for the second year. To retain and extend the option for a third year, Vale must make a further payment of US\$1,000,000 to Avanco.
4. Based on drilling results Vale will pay Avanco a royalty for any in-situ. JORC compliant iron ore resources in the measured and indicated categories.
5. On Avanco receiving funds from Vale inclusive of 2 and 3 (above) estimated at US\$10,000,000 or more, Vale will have satisfied conditions precedent and will have earned the right to complete the acquisition for sole ownership of Trindade North. The total sum of all qualifying payments to Avanco is capped at a maximum value of US\$40,000,000.
6. In the event economic mineralisation other than iron ore is discovered, both parties will renegotiate terms with Vale retaining preferential rights to first refusal.
7. Avanco can elect a representative to participate in the exploration programme.

Vale has already communicated details of its proposed drilling programme and the Company expects to provide more information on this and the start of Vale drilling in the coming weeks. The Vale transaction has the potential to deliver significant payments to Avanco of between US\$10m to US\$40m.

Corporate

The Company successfully completed a \$20m capital raising through a placement to local and overseas sophisticated and institutional investors. Avanco is now in a strong and enviable financial position to undertake the substantial exploration and development programmes over its copper and nickel-platinum projects.

The Company has appointed Mr Simon Mottram as Executive Director for Exploration, Mr Colin Jones as a Non-Executive Director and Mr Jailson Araujo as Project Manager for Rio Verde. Mr Mottram has a solid track record in executing large scale drill programmes and takes on responsibility for directing all exploration activities. Mr Jones is an outstanding minerals industry professional with a wealth of mine building and operational experience. Mr Araujo is a Brazilian geologist with much local knowledge and assumes responsibility for the management and supervision of drill programmes at the Rio Verde and neighbouring properties.

The Vale agreement is the first in a number of expected corporate activities to be successfully closed. It follows a strategy of seeking growth and realising greater value from Avanco's high quality Carajas project portfolio.

With drilling activity expanding and a number of new Carajas transactions at an advanced stage of negotiation, significant news flow is anticipated over the coming months.

Subsequent Events

There have been no significant events subsequent to the half-year to the date of this report.

To the members of Avanco Resources Limited

We have reviewed the accompanying half-year financial report of Avanco Resources Limited, which comprises the statement of financial position as at 31 December 2010, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the half-year ended on that date, other selected explanatory notes and the directors' declaration of the consolidated entity comprising the company and the entities it controlled at the half-year end or from time to time during the half-year.

Directors' Responsibility for the Half-Year Financial Report

The directors of the company are responsible for the preparation and fair presentation of the half-year financial report in accordance with Australian Accounting Standards (including the Australian Accounting Interpretations) and the *Corporations Act 2001*. This responsibility includes establishing and maintaining internal controls relevant to the preparation and fair presentation of the half-year financial report that is free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's Responsibility

Our responsibility is to express a conclusion on the half-year financial report based on our review. We conducted our review in accordance with Auditing Standard on Review Engagements ASRE 2410 *Review of Interim and Other Financial Reports Performed by the Independent Auditor of the Entity*, in order to state whether, on the basis of the procedures described, we have become aware of any matter that makes us believe that the financial report is not in accordance with the *Corporations Act 2001* including: giving a true and fair view of the consolidated entity's financial position as at 31 December 2010 and its performance for the half-year ended on that date; and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*. A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

In conducting our review, we have complied with the independence requirements of the *Corporations Act 2001*. We have given to the directors of the company a written Auditor's Independence Declaration, a copy of which is included in the Directors' Report.
